

ExtraordinaryPM[®] Mastery *The Workshops*

Enhancing project success in your organisation, our unique approach to training and mentoring will not only boost output and productivity, but will also develop your project managers into truly extraordinary leaders.

Excellence through practical application

Project management is all about making change happen. We only see the true benefit of that change when people begin to think and act differently, and when we see great leadership and people skills at work. Because ultimately, people are the real difference between a project (or even a business) succeeding or not.

At **ExtraordinaryPM**, we know that the best way to leverage skills and experience is by sharing our knowledge openly, allowing insights and expertise to multiply and ultimately benefit as many people in the profession as possible. To this end, we deliver a mixture of industry networking and speaking engagements, as well as regular webinars, articles and thought leadership pieces.

Tailored to your organisation, delivering a tailored, condensed, yet fully interactive and engaging version of ExtraordinaryPM's highly transformative Mastery Programme

ExtraordinaryPM Mastery The Workshops

Energise and upskill your team members by focussing on applied techniques, leadership, teamwork, and collaboration, within the project management environment.

ExtraordinaryPM's Mastery: The Workshops is a tailored, cut down - yet fully involved and immersive version of our highly successful ExtraordinaryPM Mastery Programme,

"I loved just how interactive the course was - having conversations with the team as a whole and then breaking things down together. It took what we were learning from feeling theoretical to feeling real and achievable."

Structured using the same robust and proven 5T's Framework that we teach on the full Mastery Programme, **Mastery: The Workshops** uses interactive real-life scenarios to facilitate in-depth learning, allowing participants to put their learning and new skills into practice straight away.

"Every week I took something new away that I was immediately able to put into practice as a project manager."

“ ★ ★ ★ ★ ★ ”

71% of previous participants on the course gave ExtraordinaryPM's **Mastery: The Workshops** a **FIVE STAR** rating, with 100% stating they would be actively recommending to their colleagues and putting team members forward for it as soon as possible!

Spread across a series of live, in-person sessions, **Mastery: The Workshops** demonstrates how project success is a direct result of strong leadership, engaged teams, clear outcomes and a consistent focus on business and customer needs.

"The sessions were all very thought provoking and gave me a new way of looking at different situations."

Kicking off with an Opening Workshop to introduce the programme and 5T's framework, Target, Terrain, Tribe, Time and Thrive, **Mastery: The Workshops** takes each of these themes in turn (as outlined below) and examines some of the tools and techniques that can be applied to achieve maximum success in delivering their projects.

Target	Terrain	Tribe	Time	Thrive
<p>How to be clear on your project goals, aims and outcomes</p> <p>Defining the "Big Why" and using it to engage and aid decision making</p>	<p>Understanding of the terrain or environments your project is operating within</p> <p>Internal and external layers; Where to focus and how to use different perspectives</p>	<p>Who is in your Tribe? What roles do you each play?</p> <p>Leadership styles and techniques plus how to keep focus and manage conflicts</p>	<p>Time mastery: Efficiency and effectiveness</p> <p>Choosing how to work and where you can make the biggest impact</p>	<p>How to take care of yourself, putting on your own oxygen mask first</p> <p>Thriving as a team, personal motivation and survival strategies</p>

We then wrap up with a closing workshop, review of each of the T's in the 5T's Framework and the power when interlinking them together as well as reflecting on key learnings and how to embed them further.

ExtraordinaryPM's **Mastery: The Workshops** programme has been designed to run over 20 hours as half or full day sessions and is targeted at project management and delivery professionals with 3+ years' experience.

Each session includes a mixture of materials, tools and discussion. We will also point delegates towards some additional resources that relate to each of the topics covered during the programme.

Sessions are spaced out at least 1 week apart to maximise the programme's effectiveness, allowing the learning to be fully embedded and also applied during the process.

Mastery: The Workshops is currently in the final stages of its CPD accreditation.

"I found the whole course very insightful, and I can already see the impact it's made on me as a project manager and leader. We often focus on the hard skills rather than the softer skills, so it was refreshing to focus on this area and to see how it can really impact and improve the way we work."
